

International Cooperation Platforms in Jiangsu

1. China-UK Science Bridges Technology Transfer Center

Chinese Partner: Science and Technology Innovation Public Service Center of Changzhou

Foreign Partner: University of Bradford, UK

Profile:

China-UK Science Bridges Program is one of the inter-governmental programs of S&T cooperation between China and Europe, which is strongly supported by the Ministry of Science and Technology of China (MOST) and funded by the Research Councils UK (RCUK). This Program aims to promote research cooperation between the leading universities and high-tech enterprises in China and UK. The Science and Technology Bureau of Changzhou had great foresight to execute the Program in the city since 2009, and successfully held two open innovation workshops in 2010 and 2011. Meanwhile, the science special fund has been established to select and support projects for the Program.

China-UK Science Bridges Technology Transfer Center is a professional technical service center established against the background of the Program. In addition to promoting the Program implementation, it will also provide comprehensive services including technology transfer, technical and management consulting, etc. for the enterprises and research organizations in China and UK.

2. Sheng-BDO (Wuxi) Technology Transfer Company

Chinese Partner: Wuxi Shanshui City Management Committee

Foreign Partner: Sheng-BDO Ziv Haft China Business Development, Israel

Profile:

It is a company of international technology cooperation and one of the centers for China-Israel technology transfer, established against the background of the close partnership between Jiangsu and Israel. The company is a member of the well-known BDO Ziv Haft Consulting & Management Group in Israel, which is a part of BDO's (the world's fifth largest accounting firm) global network. With a professional management team experienced in both the Chinese and Israeli markets, the company is able to provide its clients in both countries with a professional and efficient package

of services (“one stop shop”) to meet their requirements. As an international technology transfer center, the company is dedicated to bringing Israel's innovative technologies to Wuxi, helping local enterprises find their Israeli partners, and assisting Israeli companies to start businesses in Wuxi.

3. China (Jiangsu)-Ukraine Marine Equipment and Ocean Engineering International Technology Transfer Center

Chinese Partner: Jiangsu University of Science and Technology

Foreign Partner: Admiral Makarov National University of Shipbuilding, Ukraine

Profile:

Jointly established by Jiangsu University of Science and Technology (JUST) and Admiral Makarov National University of Shipbuilding (NUS) in Ukraine, the Center serves as a platform for international technology transfer in shipbuilding and ocean engineering. It is devoted to the introduction, digestion and absorption of advanced technological achievements from Ukraine for the development of the shipbuilding and ocean engineering industries in Jiangsu. It will bring in R&D teams from NUS and other Ukrainian research organizations to promote their collaborative innovation with JUST and the local enterprises in Jiangsu. It will also provide consulting services for Jiangsu enterprises to assist them in finding solutions to their technical problems. Through accumulating innovation resources, the Center aims to boost the local self-dependent innovation competence in science and technology and make contributions to enhancing the level of technologies in naval architecture and ocean engineering in Jiangsu.

4. ISIS (Changzhou) International Technology Transfer Center

Chinese Partner: Changzhou Productivity Promotion Center

Oxtech Investment Consulting (Changzhou) Ltd.

Foreign Partner: Isis Innovation Ltd., UK

Profile:

Isis (Changzhou) International Technology Transfer Center is the first international technology transfer center invested by Isis Innovation in Mainland China. By making full use of the strong R&D capabilities of University of Oxford, the global information network resources, professional management and operational experience of Isis Innovation, and with the knowledge regarding the current development needs

for technological invention, innovation and upgrading of local enterprises and industries, the Center will provide technology transfer and innovation management consulting services for the enterprises, S&T parks, incubators, research organizations and governments in Changzhou and the other cities of Jiangsu Province. It aims to become a bridge for communications and cooperation between University of Oxford and Jiangsu enterprises in the field of technology transfer.

5. China (Changzhou)-Israel International Enterprise Incubator

Chinese Partner: Changzhou Sanjing World Technology Industry Development Co., Ltd.

Foreign Partner: Shirat Enterprises Ltd., Israel

Profile:

Jointly established by Shirat Enterprises Ltd. of Israel, Changzhou Sanjing World Technology Industry Development Co., Ltd., and the government of Changzhou Xinbei District, the incubator is dedicated to creating an international incubation platform to facilitate the commercialization of innovative technologies from Israel and other countries in the city of Changzhou. A joint management company has been set up by Shirat and Sanjing to provide various value-added services for the high-tech companies who have found their homes in the incubator, whereas the local government provides financial support. The management company will assist the incubated companies in making an Accelerated Development Plan (ADP) for the initial two years, including strategic development, main tasks, budget plan and milestones, etc. Presently, the incubator has successfully introduced four Israeli companies: Changzhou Qualion NMR Systems Co., Ltd., Changzhou Syrolight Medical Devices Co., Ltd., Kencap Technology (Changzhou) Co., Ltd. and Biosep Medical Technology (Changzhou) Co., Ltd.
